The following funds may also use equity derivatives for hedging, efficient portfolio management, and optimizing returns, in line with IRDAI regulations and the fund's risk management framework.

1. High Growth Fund II
2. Diversified Equity Fund II
3. Growth Super Fund II
4. Ring India Manufacturing Fund
5. Flexi Cap Fund

Derivative Exposure limits would be governed by the Board Approved Hedging Policy (for Equity Derivatives) and will adhere to the regulatory limits/framework prescribed by IRDAI.

Let's understand through different illustrations in below section

Equity Derivative for Hedging Purposes:

While creating a diversified portfolio helps reduce stock-specific risks, to protect portfolio returns from systematic risks, the funds may resort to hedging through Index/Stock Futures or Index/Stock Options as stipulated by IRDAI. This helps reduce market risk and volatility for policyholders. We will be complying to the exposure limits as prescribed by IRDAI guidelines.

Illustration of Futures

Assume a portfolio of ₹50,00,000. If we anticipate volatility in the markets, we may hedge the portfolio with Index Futures as per IRDAI guidelines. For example, we hedge the portfolio by selling Index Futures of Nifty MidCap.

-Let's assume Current Index Level is ₹15,000

- Lot Size: 140
- Value of 1 Lot:
 $\text{₹}15,000 \times 140 = \text{₹}21,00,000$

Since we are holding a long position in the stock portfolio, we will take an opposite position to hedge it.

- Sell 1 lot of Nifty MidCap Index Futures worth ₹21,00,000
- Remaining unhedged portion = ₹50,00,000 – ₹21,00,000 = ₹29,00,000

-If Market Falls by 10%

Loss from Portfolio:

$$10\% \text{ of } \text{₹}50,00,000 = \text{₹}5,00,000$$

Profit from Short Position in Index Futures:

-Futures also fall by 10%

$$\text{Initial Futures Value} = \text{₹}21,00,000$$

$$\text{New Futures Value} = \text{₹}18,90,000$$

$$\text{Gain} = \text{₹}21,00,000 - \text{₹}18,90,000 = \text{₹}2,10,000$$

Overall Loss Reduced To:

$$\text{₹}5,00,000 - \text{₹}2,10,000 = \text{₹}2,90,000$$

This was possible because the portfolio was carefully hedged with Index Futures before the market crash and Similar illustration applies for selling stock futures.

Illustration of Stock Options

Assume a scenario where we are long on a particular stock “B” in the cash market.

- Let's assume the current Price to be ₹250
- Quantity: 8,000 shares
- Portfolio Value: ₹20,00,000
- Put Option Premium: ₹6 per share

Due to uncertainty, we expect adverse impact on the stock price. As per IRDAI guidelines, we can buy a Put Option of that stock in the derivatives market.

Case 1: Stock Price Moves Up to ₹270

- Cash Market Profit: ₹20 per share = ₹1,60,000
- Loss on Put Premium: ₹48,000
- Net Profit: ₹1,12,000

Case 2: Stock Price Falls to ₹230

- Cash Market Loss: ₹1,60,000
- Put Option Gain: ₹1,60,000 – ₹48,000 = ₹1,12,000
- Net Loss: ₹48,000 only

Case 3: Stock Price Remains ₹250

- Cash Market Impact: ₹0

- Premium Loss: ₹48,000
- Net Loss: ₹48,000

Similar illustrations applies for selling an Index Option.

Secure Plus Fund (SFIN: ULIF01628/04/09LIFESECPLS104)

(This Fund is available only under Systematic Transfer Plan (STP) strategy)

The investment objective of the Fund is to provide higher security of investment by way of higher proportion of investment in sovereign papers that carry an implicit guarantee for repayment of principal and interest from the Government of India. This Fund invests in debt instruments such as Government Securities, Corporate Bonds, Money Market Instruments etc. issued primarily by Government of India/State Governments, Corporate and banks. The Fund also invests in money market instruments as prescribed by IRDAI. No investment is made in equities.

The risk rating and the investment mix of the Secure Plus Fund is as follows.

Investment Mix of the Funds (in %)					
Fund	Risk Rating	Govt Securities	Corporate Bonds	Money Market & Cash Instruments	Equities
Secure Plus Fund	Low	60 – 100	0 – 40	0 – 40	Nil

The details of the available investment strategies are as follows:

– Systematic Transfer Plan

Systematic Transfer Plan helps you replicate a rupee cost averaging method on your annualized premium. This option is available only for single premium policies or policies taken with annual mode. The single / annual premium received net of any premium allocation charge shall be allocated first to the Secure Plus Fund. Immediately thereafter and on each subsequent monthly anniversary, the Fund Value of $[1 / (13 - \text{month number in the policy year})]$ of the Units available at the beginning of the month shall be switched to Growth Super Fund or Growth Super Fund II (as chosen at the Date of Commencement of Risk) automatically by cancelling Units in the Secure Plus Fund, and purchasing Units in the Growth Super Fund or Growth Super Fund II (as applicable) till availability of Units in Secure Plus Fund.

For example:

If the policy month is 1, then $1 / (13-1) = 1/12^{\text{th}}$ of the Units will be switched;

If the policy month is 2, then $1 / (13-2) = 1/11^{\text{th}}$ of the Units will be switched;

If the policy month is 11, then $1 / (13-11) = 1/2$ of the Units to be switched; and

If the policy month is 12, then $1 / (13-12) = \text{Balance Units}$ to be switched

Assume the number of Units in the Secure Plus Fund in the first month is 120. The amount switched from Secure Plus Fund shall be $[120 / (13-1)] = 10 \times \text{NAV}$ of the units in Secure Plus Fund at the date of switching. However, the number of units shall be purchased at the then prevailing NAV of the Growth Super Fund or Growth Super Fund II (as chosen by the policyholder at inception of policy) and hence they could be more or less than 10 units.

There shall be no Switching Charge to affect switches under the Systematic Transfer Plan option. During the period when Systematic Transfer Plan is in-force, Partial Withdrawal of Units shall not be permitted from the

Secure Plus Fund. You do not have an option to redirect premiums or effect unit switches during the period this option is in force.

You may opt out of or opt for the Systematic Transfer Plan option by giving a written request to the Company. Once accepted, the request shall be effective on or from the policy anniversary following the receipt of such request. Please note that there are no charges for opting out of or opting for the Systematic Transfer Plan option.

In case You fail to pay the due annual premium within the grace period, the Systematic Transfer Plan shall cease to apply and the annual premium received after the expiry of grace period shall be allocated to the Growth Super Fund or Growth Super Fund II (as applicable) or any other Fund of Your choice. Hence, you have an option to choose the Fund of your choice in case the premium is paid after the expiry of grace period. In case You do not give any request, premium automatically gets allocated to Growth Super Fund or Growth Super Fund II (as applicable). The Systematic Transfer Plan option shall be automatically applied for all future annual premiums received thereafter but within the grace period, unless advised otherwise.

– **Dynamic Fund Allocation**

Dynamic Fund Allocation option is an investment strategy which in early part of your Policy Term invests in equity oriented fund and as your Policy Term progresses it shifts the Fund allocation towards more conservative fund. You can opt for Dynamic Fund Allocation option only at the inception of policy. Under this option, assets under management shall be maintained amongst Growth Super Fund or Growth Super Fund II (as chosen by the policyholder at inception of policy) and Secure Fund in a pre-defined proportion that changes depending upon the years left to maturity as per the matrix below. Switching of existing Fund Value shall happen on the policy anniversary and Allocation of premium received amongst the Funds shall happen on the date of receipt of such premium or premium due date, whichever is later, in the proportion mentioned in the table below. You do not have an option to redirect premiums or effect unit switches during the period this option is in force. You may opt out of the “Dynamic Fund Allocation” option anytime during the Policy Term, which will then be effective from the next policy anniversary. Also during the time this option is in force, you are not allowed to exercise free Switches or Premium Redirection options. Once opted out, “Dynamic Fund Allocation” cannot be opted again. Also post opting out you will be allowed to exercise free Switches or Premium Redirection options.

This option provides automatic allocation of premium(s) received and switching of existing Fund Value as per a pre determined proportion as specified in the table below:

Number of Years to Maturity	Assets under management to be maintained under the Growth Super Fund or Growth Super Fund II*	Assets under management to be maintained under the Secure Fund
16 – 20	80%	20%
8 – 15	70%	30%
4 - 7	50%	50%
0 - 3	20%	80%

*As chosen by the policyholder at inception of policy

You can either opt for Systematic Transfer Plan or Dynamic Fund Allocation option during the Policy Term but not both.

Discontinuance Policy Fund (SFIN: ULIF002021/06/13LIFEDISCON104)

The Discontinuance Policy Fund is available only in case of policy surrender or discontinuance in first five policy years.

Fund Name	Government Securities	Corporate Bonds	Money Market & Cash Instruments	Equity & Equity related securities	Risk Rating
Discontinuance Policy Fund	60-100%	Nil	0-40%	Nil	Low

The minimum guaranteed return on this Fund is 4.0% per annum (or as mandated by IRDAI from time to time). The excess income earned in the Discontinuance Policy Fund over and above the minimum guaranteed interest rate shall also be apportioned to the Discontinuance Policy Fund in arriving at the proceeds of the discontinued policies and shall not be made available to the Company.

2. Axis Max Life Insurances shall specify that, in the event of certain force majeure conditions, the declaration of NAV on a day-to-day basis may be deferred and could include other actions as a part of investment strategy (e.g. taking exposure of any Segregated Fund (SFIN) up to 100% in Money Market Instruments [as defined under clause (1)(8) of Part-1 of Schedule III of IRDAI (Actuarial, Finance and Investment Function of Insurers) Regulations, 2024])

However, the Axis Max Life Insurance may value the SFIN less frequently in extreme circumstances external to the Axis Max Life Insurance i.e. in force majeure events, where the value of the assets is too uncertain. In such circumstances, Axis Max Life Insurance may defer the valuation of assets for up to 30 days until Axis Max Life Insurance is certain that the valuation of SFIN can be resumed.
 - b. Axis Max Life Insurance shall inform IRDAI of such deferment in the valuation of assets. During the continuance of the force majeure events, all request for servicing the policy including policy related payment shall be kept in abeyance.
 - c. Axis Max Life Insurance shall continue to invest as per the required fund mandates. However, Axis Max Life Insurance shall reserve its right to change the exposure of all or any part of the Fund to Money Market Instruments in circumstances mentioned under points (a and b) above. FLEXIBILITIES OFFERED

1. Switch

You may Switch between available Funds at any time during the Policy Term, subject to a minimum Switch amount of ` 5,000. There is no limit on number of switches done in a policy year i.e. You may switch any number of times without any charges being levied. Following receipt of your written notice, we will redeem the Units in the Fund you wish to switch from and purchase Units in the Fund you wish to switch to at the prevailing NAV.

We may at any time impose a complete or partial ban on switches, with prior approval from the Authority, for a time period not exceeding 30 days, if the Company considers that it is appropriate to do so in order to maintain the stability of a Fund or Funds or is necessary to protect Your interest. Such situation may arise under extraordinary circumstances such as non-availability of market prices, occurrence of any catastrophe where the declaration of NAV is not possible.

You shall not be allowed to exercise this option during the period of discontinuance in first five years of the policy.

Switches may be allowed during the settlement period.

Switches may be allowed in case the policy acquires paid up status post lock in period.

2. Premium Redirection

You may redirect your future premiums between available Funds at any time by giving us a written notice before the premium due date. Your notice must quote your policy number and it must specify precisely the Fund(s) in which you wish to redirect the premiums along with the percentage of premium that you wish to allocate against each Fund. A maximum of six (6) Premium Redirections are allowed in a policy year and all are free of charge.

3. Partial Withdrawal

You can make partial withdrawals which will be affected by cancelling units subject to the following conditions:

- No partial withdrawals are allowed in the first five policy years and thereafter a maximum of two partial withdrawals are allowed in any policy year.
- The minimum amount of partial withdrawal allowed per transaction is Rs 5,000.
- In the case of child policies, partial withdrawals shall not be allowed until the minor life insured attains majority i.e. on or after attainment of age 18 (as on last birthday)". The maximum amount of partial withdrawal allowed in any policy year is 50% of the Fund Value as on the date of partial withdrawal subject to the Fund Value immediately after partial withdrawal being at least equal to one current annualized premium or 25% of Single premium, as the case maybe. Thus, you may make two partial withdrawals in any policy year such that the sum of percentages of Fund Value withdrawn, is less than or equal to 50%.
- The Sum Assured will reduce to the extent of the partial withdrawals made during the two years period immediately preceding the death of the Life Insured.
- The policyholder shall not be allowed to exercise this option during the period of discontinuance and settlement period.

The Company may at any time impose a complete or partial ban on partial withdrawal, with prior approval from the Authority, for a time period not exceeding 30 days, if the Company considers that it is appropriate to do so in order to maintain the stability of a Fund or funds or is necessary to protect Your interest. Such situation may arise under extraordinary circumstances such as non-availability of market prices, occurrence of any catastrophe etc. where the declaration of NAV is not possible.

4. Settlement Option

You may, at least fifteen (15) days prior to the Maturity Date, opt for a Settlement Option, pursuant to which the Company will continue to manage the Funds for you for a maximum period of five (5) years from the Maturity Date and make periodic payments. While opting for settlement option you will have to instruct us on settlement period (up to 5 years) and the frequency (monthly, quarterly, semi-annual or annual) of payouts. Under Settlement Option, the balance number of Units in the Fund at the start of the settlement period will be divided in equal installments for payout over the settlement period.

For example:

Settlement Period = 5 years

Frequency = Quarterly

No. of installments = $5 \times 4 = 20$

No. of units remaining at maturity = 1,200

Each payment will be equal to 1,200/20 units multiplied by NAV on the date of payment i.e. 60 units multiplied by NAV on the date of payment.

During the settlement period, Fund Management Charges shall continue to be levied. There shall be a risk cover equal to 105% of the total premiums paid for a period not exceeding 5 years from the maturity date and mortality charges will be deducted basis the sum at risk. You shall continue to bear all investment risks. Units will be cancelled at the prevailing NAV to make periodic payments of the Fund Value. During the settlement period, you will not be entitled to affect Partial Withdrawal however, you may exercise Switch options.

Sum at Risk (SAR) for the product during the settlement period is defined as follows: Max (105% of total premiums paid – Total Fund Value, 0)

In case of the death of the Life Insured during the settlement period, the Fund Value subject to a minimum of 105% of total premiums paid, prevailing as on the date of intimation of death, will be paid. You may, at any time, opt out of the Settlement Option pursuant to which the Company shall close the Unit Account on the date of receipt of such request and pay the prevailing Fund Value.

5. **Premium Reduction post 5 years:**

The policyholder has an option to decrease the premium upto 50% of the original Annualized Premium subject to the minimum premium limit, only once post the end of 5-year lock-in period. The intimation about exercising this option should be given 15 days prior to the premium due date. Once reduced, the premium cannot be increased. The Sum Assured will be reduced proportionately to the new annual premium and all the applicable charges will be deducted accordingly.

Please note that in case of reduced premium option, the sum assured of rider attached (if any) would also reduce and the premium of the rider would be revised proportionately. In case the rider boundary conditions are violated for regulatory boundary conditions, the rider benefit will be lapsed. In any case, the reduced premium payable cannot be less than the minimum premium allowable for the product.

Guaranteed loyalty addition will start and rate of wealth booster will be determined basis the band under which the policy will fall post premium reduction.
